

BUCKS COUNTY DELAWARE WATERFRONT STUDY

What will the Bucks County Delaware River waterfront look like in ten years?

A vibrant and accessible waterfront?

Enhanced natural areas complemented by stable existing communities and vibrant new businesses and residential uses?

How can this be achieved?

What are lessons learned from other communities as they reclaimed older industrial lands for new community benefits?

Come Hear Directly from an Expert Panel!

The panel is part of a yearlong Waterfront Study, undertaken by the County of Bucks and the six municipalities along the waterfront — Bensalem Township, Bristol Borough, Bristol Township, Falls Township, Morrisville Borough and Tullytown Borough. The study will chart a vision and course of action to provide for improved access to the riverfront and to promote targeted economic development within the six municipalities that comprise the study area.

The focus of the study is on building consensus among the municipalities, providing enhanced public access to the riverfront, and on stimulating economic development.

The panel will include economic development practitioners and planners who have successfully improved their communities through redevelopment of brownfields and the promotion of economic investment.
